

LITHIUM BATTERY MARK

for lithium cells and batteries as per ICAO TI / IATA DGR according to Section IB or Section II of the Packing Instructions 965 - 970 and as per ADR and IMDG Code according to Special Provision 188

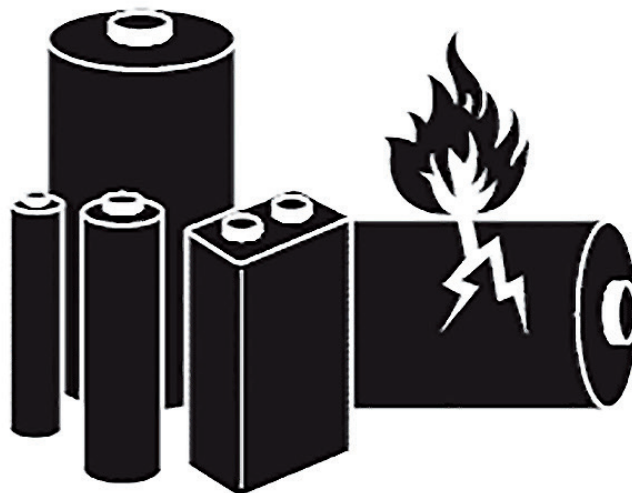

- 1 In the top field enter the letters "UN" followed by the UN number.
Die Markierung muss folgendes enthalten:
"UN 3090" for lithium metal cells and batteries
"UN 3091" for lithium metal cells and batteries contained in equipment or packed with equipment or for the combination of contained in equipment and packed with equipment
"UN 3480" for lithium ion cells and batteries
"UN 3481" for lithium metal cells and batteries contained in equipment or packed with equipment or for the combination of contained in equipment and packed with equipment
- 2 Enter a telephone number for further information in the bottom field. This number must be including area and country code.
- 3 Cut out the lithium battery mark after printing along the dotted line.
- 4 Affix the lithium battery mark on one side of the package.

The mark must be at least 120 mm x 110 mm in size. For smaller packages where the standard mark does not fit on one side of the package the mark may be reduced to 105 mm x 74 mm (See example on Page 2).

Please check the dimensions after printing since printer settings might cause variations.

! *The reduced mark may only be used on small packages where the standard mark does not fit on one side of the package.*
